

## Web Interface

| Task # | Task & Description  | Priority Rank | Difficulty | Date Completed |
|--------|---|---------------|------------|----------------|
| 1      | <b>Graduation Date</b>  | 4             | 4          | 2/28/2009      |
|        | Graduation year always resets to the current year, not the year input. Shows spring 2009 for him but should show spring 2011. Even when he changes it to the correct date, it always resets back to the current year.   |               |            |                |
|        | <b>Comment:</b> Probably a small bug. This would be a good place to start   |               |            |                |
| 2      | <b>Schedule</b>   | 2             | 1          | 4/19/2009      |
|        | He would like to see a better method or interface for selecting times in schedule.  |               |            |                |
|        | <b>Comment:</b> Requires some input from Carole and tutors as how to best implement a better schedule. Also should include some external research into other calendar applications specific to time slots (Google calendar, etc.). An excellent opportunity to learn and utilize Javascript (AJAX). |               |            |                |
| 3      | <b>Classes</b>  | 1             | 2          | 3/9/2009       |
|        | Some of the classes she has taken are not listed  |               |            |                |
|        | <b>Comment:</b> Again, probably an issue with the course management feature. The office is the only one who can add courses to be selected by the tutors. As we discussed, we may be able to automate the process.  |               |            |                |
| 4      | <b>Class Titles</b>   | 3             | 3          | 2/28/2009      |
|        | She would like to see the name of the class before adding it to her schedule. She said a lot of tutors don't remember the exact number for the class. Instead of adding and removing until they find the right one, it would be easier if they saw the class name before adding to their schedule.  |               |            |                |
|        | <b>Comment:</b> Relatively simple. Similar problem in Carole's interface, if I remember correctly. The data should be readily available already, just need to display it.   |               |            |                |

### Extra Requests

|   |  |  |  |          |
|---|--|--|--|----------|
| 5 | <b>Modules</b>   |  |  | 4/4/2009 |
|   | As stated on the VB interface sheet, Carole wanted to keep track of the modules the tutors have completed. With this, she wanted me to add a section on the web interface for them to view their progress. |  |  |          |
