Controls

NOTE: The PC commands are absolute and thus will instantly return values of 1. Meanwhile the controller would normally return an entire range value (e.g 0-1). This can cause camera snapping and limit the ability to move the mower in specific motions.

The following layout will go as follows:

Controller Command (PC Command)

>Action.

Game Controls:

LeftJoystick (Forward E, Backwards D)

>Controls the back left tire. Forwards will rotate the tire forward, backwards will rotate the tire in reverse.

RightJoystick (Forward I, Backwards K)

>Controls the back right tire. Forwards will rotate the tire forward, backwards will rotate the tire in reverse.

Note: Both joysticks in the forwards direction (E and I) will move the mower forwards just as both joysticks backwards (S and K) will move the mower in reverse.

L1 (A)

>Shift the mowers gear down.

R1 (D)

>Shift the mowers gear up.

L2 (Q)

>Looks left.

R2 (O)

>Looks right.

Up Directional Pad (L)

>Toggle camera between first person and top down.

Down Directional Pad (J)

>Toggle mower sound on/off.
