

- Hidden, App.tsx is the file that sets up navigation between visible pages.
- Visible, these pages make the app run and have an appearance. The HomePage.tsx is the initial screen and has buttons to the other three screens.
- Hidden, these pages set up the two pop up displays that happen in the application. One is for selecting a BLE device and one is for confirmation doing an action such as deleting.
- Hidden, this is just a back up file while I was working on doing different implementations of the DisplayGame screen.
- Hidden, this is where all of the styling for the app is stored. Backgrounds, fonts, and css like stylesheet.

HomePage.tsx

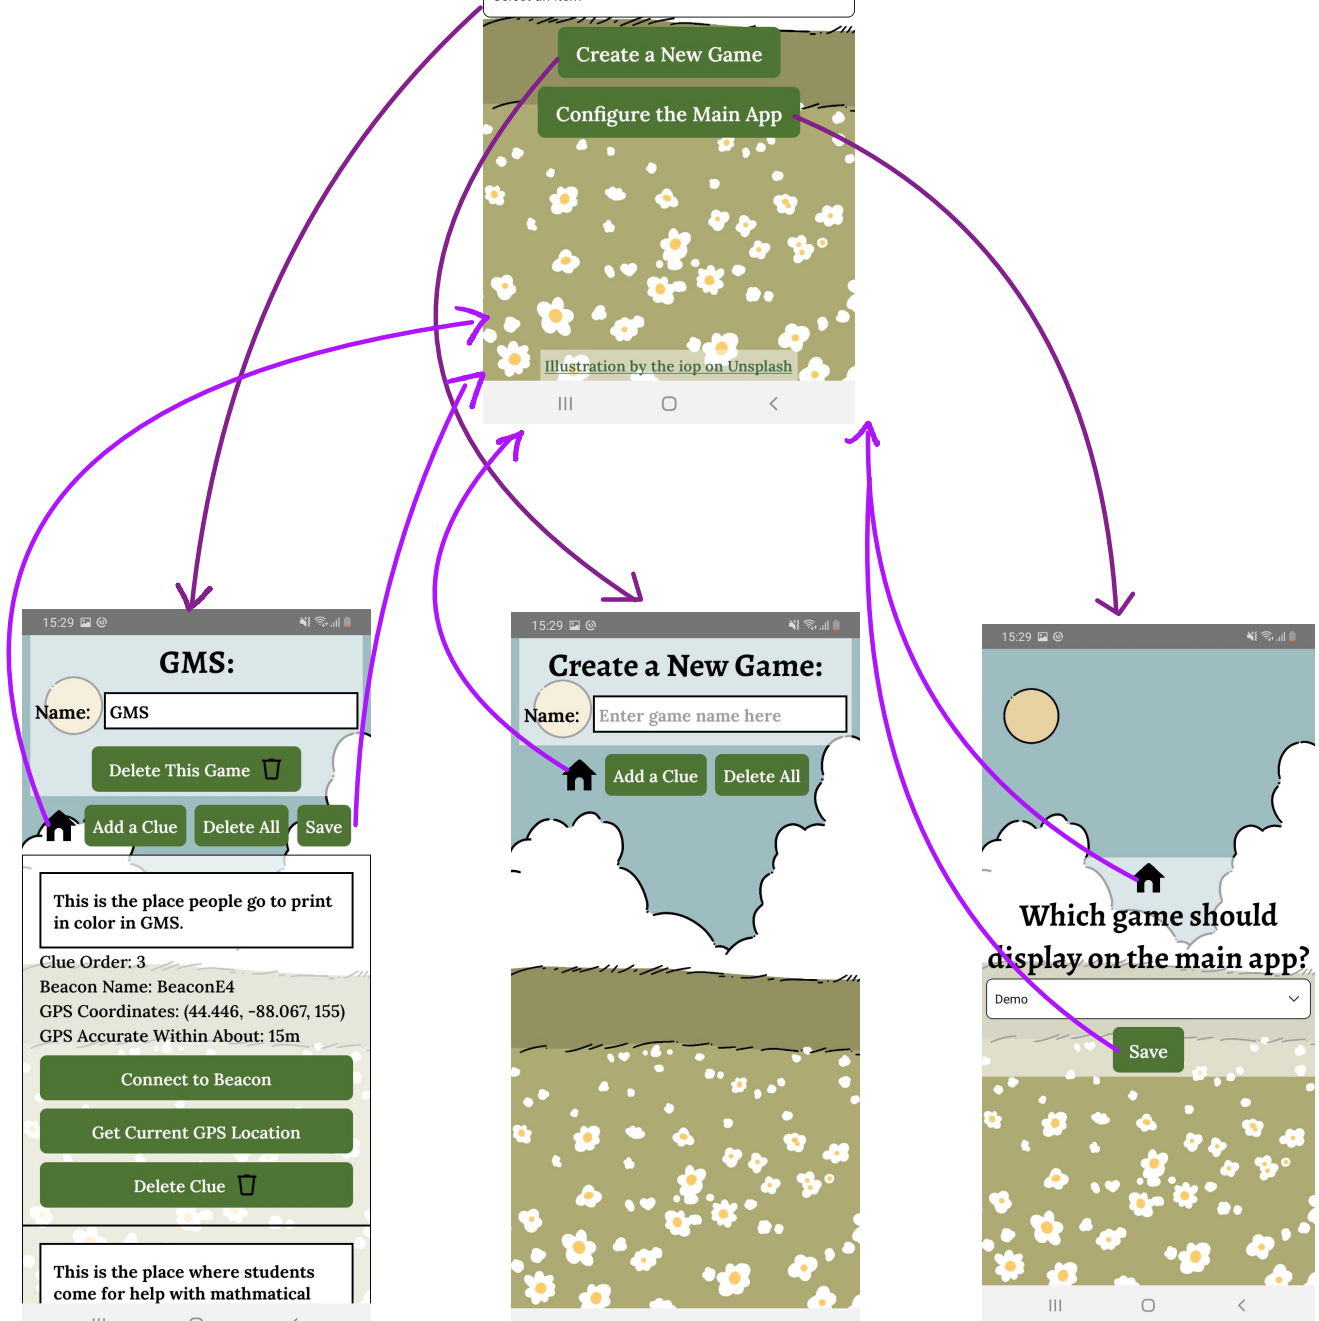

Display Game Page.tsx

Create Game Page.tsx

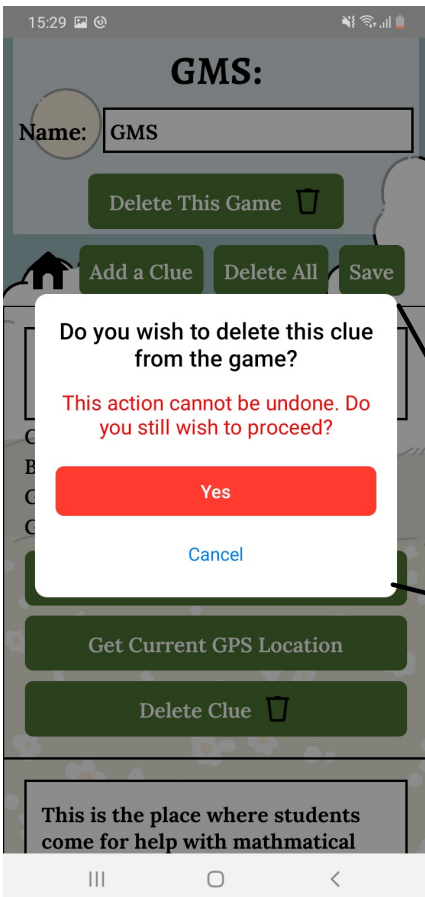

Config Page.tsx

Note: This is applicable to CreateGamePage.tsx as well

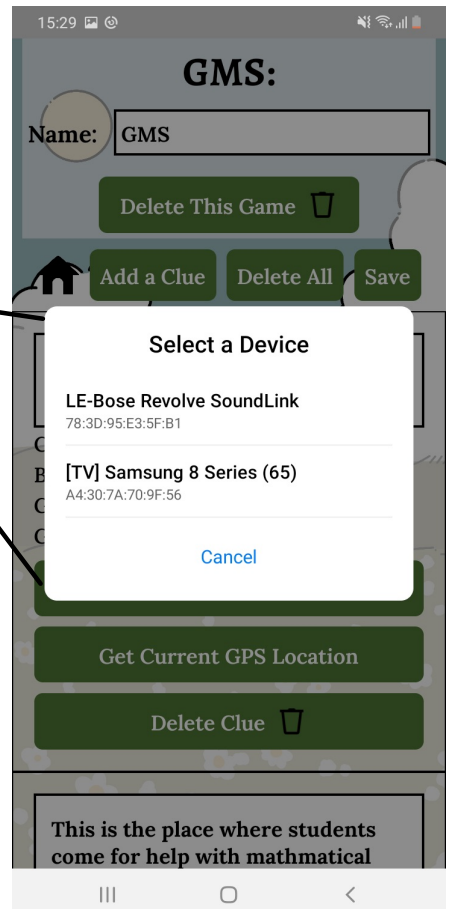

Display Game Page.tsx

Display Game Page.tsx

Device Picker Modal.tsx

Confirm Picker Modal.tsx

Display Game Page.tsx
